JOURNAL OF AEROSOL SCIENCE

HONORARY EDITORIAL BOARD

M. M. BENARIE, 20 Bd Jean Pain, 38000 Grenoble, France.

J. GEBHART, Gesellschaft für Strahlen- und Umweltforschung, Paul-Ehrlich-Str. 20, D-60596 Frankfurt/Main, Germany.

D. HOCHRAINER, Boehringer Ingelheim KG, D-55216 Ingelheim am Rhein, Germany.

D. INGHAM, Department of Applied Mathematics, University of Leeds, Leeds LS2 9JT, U.K.

J. PICH, Institute of Biophysics, Salmovska 3, 120000 Prague, Czech Republic.

O. PREINING, Institut für Experimentalphysik, Universität Wien, Strudlhofgasse 4, A-1090 Vienna, Austria.

EDITORIAL BOARD

D. BOULAUD, Laboratoire de Physique et Métrologie des Aérosols, Commissariat a l'Energie Atomique, CEN/FAR, B.P. 6, 92265 Fontenay-aux-Roses Cédex, France.

C. F. CLEMENT, 15 Witan Way, Wantage, Oxon OX12 9EU, U.K.

E. J. DAVIS, Department of Chemical Engineering, BF-10, University of Washington, Seattle, WA 98195, U.S.A.

H. FISSAN, Universität Duisburg, Bismarckstrasse 81, D-47048 Duisburg, Germany.

L. GRADON, Institute of Chemical Engineering, Warsaw University of Technology, 00-645 Warsaw, Poland.

H.-C. HANSSON, Department of Meteorology, University of Stockholm, Arrhenius Laboratory, S-10691 Stockholm, Sweden.

J. HO, Defence Research Establishment, Suffield, Box 4000, Medicine Hat, Alberta T1A 8K6, Canada.

H. HORVATH, Institut für Experimentalphysik, Universität Wien, Strudlhafgasse 4, A-1090 Vienna, Austria.

W. JOHN, 195 Grover Lane, Walnut Creek, CA 94596, U.S.A.

E. I. KAUPPINEN, VTT Aerosol Technology Group, VTT Chemical Technology, P.O. Box 1401, FIN-02044 VTT, Finland.

M. KULMALA, Department of Physics, University of Helsinki, P.O. Box 9, FIN-00014 Helsinki, Finland.

A. A. LUSHNIKOV, Karpov Institute of Physical Chemistry, UI. Obukha 10, 103064 Moscow K-64, Russia.

J. MARIJNISSEN, Faculty of Technology and Materials Science, Delft University of Technology, P.O. Box 5045, 2600 GA Delft, The Netherlands.

U. C. MISHRA, Pollution Monitoring Section, Bhabha Atomic Research Centre, Bombay 400 085, India.

K. NICHOLSON, National Environmental Technology Centre, Culham, Abingdon, Oxon OX14 3DB, U.K.

K. OKUYAMA, Department of Chemical Engineering, Hiroshima University, Kagamiyama, Higashi-Hiroshima 724, Japan.

S. PRATSINIS, Department of Chemical Engineering, University of Cincinnati, 697 Rhoder Hall (ML-171), Cincinnati, OH 45221-0171, U.S.A.

V. PRODI, Dipartimento di Fisica, Università degli Studi di Bologna, Via Irnerio 46, I-40126, Bologna, Italy.

D. Y. H. PUI, Particle Technology Laboratory, Department of Mechanical Engineering, 111 Church Street S.E., Minneapolis, MN 55455, U.S.A.

A. SCHMIDT-OTT, Prozess- und Aerosolmesstechnik, Universität-GH-Duisburg, Postfach 10 15 03, D-47048 Duisburg, Germany.

M. SHAPIRO, Faculty of Mechanical Engineering, Technion-Israel Institute of Technology, Technion City, Haifa, Israel.

D. L. SWIFT, Environmental Health Engineering, School of Public Health, The Johns Hopkins University, 615 North Wolfe Street, Baltimore, MD 21205, U.S.A.

H.-C. WANG, Air Liquide, Chicago Research Center, 5230 S. East Avenue, Countryside, IL 60525, U.S.A.

In association with the Gesellschaft für Aerosolforschung (GAeF)
Association for Aerosol Research

President: R. JAENICKE (Germany)
Treasurer: G. METZIG (Germany)
Secretary-General: A. SCHMIDT-OTT (Germany)

The *Journal of Aerosol Science* is published by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. Tel: (+1865) 843000, Fax: (+1865) 843010.

Production Editor: S. FOX (Elsevier Science Ltd)

CONTENTS

NUMBER 1

Regular papers

S. P. BAKANOV — 1 Future directions for experiments in thermophoresis: a commentary

J. HWANG and J. W. DAILY — 5 Electric field enhanced deposition in flame-synthesized materials manufacturing

S. L. CLEGG and P. BRIMBLECOMBE — 19 A generalised multicomponent thermodynamic model applied to the $(NH_4)_2SO_4$–H_2SO_4–H_2O system to high supersaturation and low relative humidity at 298.15 K

R. KARLSSON and E. LJUNGSTRÖM — 39 Nitrogen dioxide and sea salt particles—a laboratory study

P. ERNEST RAJ and P. C. S. DEVARA — 51 Scattering angle distribution of laser-return signal strength in the lower atmosphere

M. AMMANN, U. BALTENSPERGER, U. K. BOCHERT, B. EICHLER, H. W. GÄGGELER, D. T. JOST, A. TÜRLER and A. P. WEBER — 61 Study of HI, HBr and NO_2 adsorption on graphite and silver aerosol particles using short-lived isotopes

A. VATAZHIN, A. LEBEDEV, V. LIKHTER, V. SHULGIN and A. SOROKIN — 71 Turbulent air–steam jets with a condensed dispersed phase: theory, experiment, numerical modeling

X. WEN and D. B. INGHAM — 95 Aspiration efficiency of a thin-walled cylindrical probe rear-facing the wind

L. C. KENNY and D. L. BARTLEY — 109 The performance evaluation of aerosol samplers tested with monodisperse aerosols

T. SCHNEIDER and E. HOLST — 127 Variability of total mass and other measures of small samples of particles

K. W. STAPLETON and W. H. FINLAY — 137 Determining solution concentration within aerosol droplets output by jet nebulizers

Commentary

T. MATSOUKAS — 147 Comment on the electrostatic energy of charged aerosols

Y. S. MAYYA — 151 Reply to the comment on the electrostatic energy of charged aerosols

News and other items

153 Proceedings of the 1993 International Conference on Aerosol Science and Technology, Taichung, Taiwan, R.O.C.

171 Book Review

173 Corrigendum

NUMBER 2

Regular papers

S. VEMURY and S. E. PRATSINIS 175 Self-preserving size distributions of agglomerates

A. GUTSCH, S. E. PRATSINIS and F. LÖFFLER 187 Agglomerate structure and growth rate by trajectory calculations of monomer–cluster collisions

W. ZULEHNER and H. ROHATSCHEK 201 Representation and calculation of photophoretic forces and torques

C. BERGER, H. HORVATH and W. SCHINDLER 211 The deposition of soot particles from hot gas streams through pipes

M. THUILLARD 219 Electric mobility measurements of small ions in the temperature range −40–20°C at constant relative humidity of 87%

R. TSAI and A. F. MILLS 227 A model of particle re-entrainment in electrostatic precipitators

M. A. HEMINGWAY and R. C. BROWN 241 A miniature electret-based device for measuring the electrical mobility of aerosols

S. ERDAL and N. A. ESMEN 253 Human head model as an aerosol sampler: calculation of aspiration efficiencies for coarse particles using an idealized human head model facing the wind

I. BALÁSHÁZY and W. HOFMANN 273 Deposition of aerosols in asymmetric airway bifurcations

D. A. EDWARDS 293 The macrotransport of aerosol particles in the lung: aerosol deposition phenomena

M. P. BERNARDIN and B. E. LEHNERT 319 Model of particle–alveolar macrophage relationships during the alveolar clearance of a low lung burden of instilled particles

Technical note

S. HEIDENREICH and H. BÜTTNER 335 Investigations about the influence of the Kelvin effect on droplet growth rates

Essay

J. W. GENTRY 341 The Aerosol Science contributions of Michael Faraday

News and other items

351 Smoluchowski Award (GAeF)

NUMBER 3

Regular papers

D. A. V. MORTON and J. P. MITCHELL 353 Aerosol penetration through capillaries and leaks: experimental studies on the influence of pressure

C. F. CLEMENT 369 Aerosol penetration through capillaries and leaks: theory

S. KALATOOR, S. A. GRINSHPUN and K. WILLEKE 387 Aerosol sampling from fluctuating flows into sharp-edged tubular inlets

I. KAŠÍK and V. MATĚJEC 399 New ways for influencing thermophoretic efficiency in the MCVD process

Y.-C. CHANG, M. B. (ARUN) RANADE and J. W. GENTRY 407 Thermophoretic deposition in flow along an annular cross-section: experiment and simulation

S. H. CHEN and H. J. KEH 429 Axisymmetric thermophoretic motion of two spheres

S. K. LOYALKA, P. TEKASAKUL, R. V. TOMPSON and R. C. WARDER, JR 445 Computation of electric fields and particle motion in electrodynamic balances

H. TAMMET 459 Size and mobility of nanometer particles, clusters and ions

M. M. R. WILLIAMS 477 Growth rates of liquid drops for large saturation ratios

C. LIU 489 Humidity effect on the aerosol particle spectra in the atmospheric boundary layer

T. HEISTRACHER and W. HOFMANN 497 Physiologically realistic models of bronchial airway bifurcations

H. C. YEH, B. A. MUGGENBURG, R. A. GUILMETTE, M. B. SNIPES, R. S. TURNER, R. K. JONES and J. P. SMITH 511 Characterization of aerosols produced during total hip replacement surgery in dogs with ^{51}Cr-labeled blood

News and other items

519 News from GAeF

NUMBER 4

W. SCHIKARSKI 521 Fuchs Memorial Award 1994

B. Y. H. LIU 523 Fuchs Award Lecture 1994. Aerosol science and microelectronics

O. PREINING 529 Fuchs Award Lecture 1994

AS 26-8-K

Regular papers

P. G. Carson, K. R. Neubauer, M. V. Johnston and A. S. Wexler — 535 — On-line chemical analysis of aerosols by rapid single-particle mass spectrometry

M. Kulmala, H. Vehkamäki, T. Vesala, J. C. Barrett and C. F. Clement — 547 — Aerosol formation in diffusive boundary layer: binary homogeneous nucleation of ammonia and water vapours

J. T. Ouyang, H. X. Hui, G. Y. Zhang and M. Cui — 559 — Generation of charged aerosol from superheated steam in Laval nozzle

D.-R. Chen and D. Y. H. Pui — 563 — Numerical and experimental studies of particle deposition in a tube with a conical contraction—laminar flow regime

Y. Dain, M. Fichman, C. Gutfinger, D. Pnueli and P. Vainshtein — 575 — Dynamics of suspended particles in a two-dimensional high-frequency sonic field

Ph. Capéran, J. Somers, K. Richter and S. Fourcaudot — 595 — Acoustic agglomeration of a glycol fog aerosol: influence of particle concentration and intensity of the sound field at two frequencies

G. Ziskind, M. Fichman and C. Gutfinger — 613 — Resuspension of particulates from surfaces to turbulent flows—review and analysis

M. A. Byrne, A. J. H. Goddard, C. Lange and J. Roed — 645 — Stable tracer aerosol deposition measurements in a test chamber

W. H. Finlay and K. W. Stapleton — 655 — The effect on regional lung deposition of coupled heat and mass transfer between hygroscopic droplets and their surrounding phase

A. D. Maynard and L. C. Kenny — 671 — Performance assessment of three personal cyclone models, using an aerodynamic particle sizer

Technical note

Cai Xiao-Shu, Zheng Gang and Wang Nai-Ning — 685 — A new dependent model for particle sizing with light extinction

News and other items

689 — Abstracts of the 1994 Annual NOSA Symposium

701 — Erratum

703 — Announcement

NUMBER 5

Regular papers

S. N. Dubtsov, K. P. Koutzenogii, A. N. Levykin and G. I. Skubnevskaya — 705 Photochemical aerosol formation of haloidbenzenes—comparison between theory and experiment

H. Rohatschek — 717 Semi-empirical model of photophoretic forces for the entire range of pressures

C. F. Clement, J. C. Barrett and R. G. Harrison — 735 The diffusive penetrability of particles into energy barriers

P. J. Ziemann, P. Liu, N. P. Rao, D. B. Kittelson and P. H. McMurry — 745 Particle beam mass spectrometry of submicron particles charged to saturation in an electron beam

A. D. Maynard — 757 The application of Electron Energy-Loss Spectroscopy to the analysis of ultrafine aerosol particles

J. Zhao and R. P. Turco — 779 Nucleation simulations in the wake of a jet aircraft in stratospheric flight

D. Lesnic, L. Elliott and D. B. Ingham — 797 An inversion method for the determination of the particle size distribution from diffusion battery measurements

F.-G. Fan and G. Ahmadi — 813 A sublayer model for wall deposition of ellipsoidal particles in turbulent streams

D. A. Lewis, I. Colbeck and D. C. Mariner — 841 Dilution of mainstream tobacco smoke and its effects upon the evaporation and diffusion of nicotine

R. M. Prokop, W. H. Finlay and K. W. Stapleton — 847 An *in vitro* technique for calculating the regional dosages of drugs delivered by an ultrasonic nebulizer

Technical notes

D. Wake — 861 An automated system for measuring the penetration of aerosols through filters

D. E. Barber — 867 Radioactivity in an aluminum oxide powder used for generating research aerosols

News and other items

871 Book Review

NUMBER 6

Regular papers

V. Chernyak — 873 The kinetic theory of droplet evaporation

I. E. Barton 887 Computation of particle tracks over a backward-facing step

H. Lin and J. Heintzenberg 903 A theoretical study of the counterflow virtual impactor

A. Gudmundsson, M. Bohgard and H.-C. Hansson 915 Characteristics of multi-nozzle impactors with 50 μm laser-drilled nozzles

D. B. Ingham, X. Wen, N. Dombrowski and E. A. Foumeny 933 Aspiration efficiency of a thin-walled shallow-tapered sampler rear-facing the wind

M. Ram, S. A. Cain and D. B. Taulbee 945 Design of a shrouded probe for airborne aerosol sampling in a high velocity airstream

D.-R. Chen, D. Y. H. Pui and S. L. Kaufman 963 Electrospraying of conducting liquids for monodisperse aerosol generation in the 4 nm to 1.8 μm diameter range

J. Patschull and P. Roth 979 Measurement and reduction of particles emitted from a two-stroke engine

P. Di Girolamo, R. V. Gagliardi, G. Pappalardo, N. Spinelli, R. Velotta and V. Berardi 989 Two wavelength lidar analysis of stratospheric aerosol size distribution

Technical notes

K. Hämeri, J. Augustin, M. Kulmala, T. Vesala, J. Mäkelä, P. Aalto and E. Krissinel' 1003 Evaluation of homogeneous droplet formation inside UCPC (TSI model 3025)

M. Azar and C. A. Ventrice 1009 Size determination of aerosol particles using the LDA-visibility technique in the backscatter direction

News and other items

1019 Abstracts of the 8th annual meeting of the Israel Association for Aerosol Research

1027 Corrigenda

NUMBER 7

Regular papers

A. Schenkel and K. Schaber 1029 Growth of salt and acid aerosol particles in humid air

Y. S. Mayya and W. Holländer 1041 Statistical mechanics of equilibrium charging of metallic aerosol particles with free-electrons at elevated temperatures

J. Smolík, B. Tříska and V. Ždímal — 1055 Thermodiffusiophoresis and droplet growth in ternary gaseous mixtures

W. Li and E. J. Davis — 1063 Measurement of the thermophoretic force by electrodynamic levitation: microspheres in air

W. Li and E. J. Davis — 1085 The effects of gas and particle properties on thermophoresis

D. Matter, M. Mohr, W. Fendel, A. Schmidt-Ott and H. Burtscher — 1101 Multiple wavelength aerosol photoemission by excimer lamps

C. Lu, H. Bai and Y. M. Lin — 1117 A model for predicting performance of an annular denuder system

Y. C. Kang and S. B. Park — 1131 A high-volume spray aerosol generator producing small droplets for low pressure applications

B. Jurcik and H.-C. Wang — 1139 On the shape of impactor efficiency curves

B. S. Cohen, J. Q. Xiong, B. Asgharian and L. Ayres — 1149 Deposition of inhaled charged ultrafine particles in a simple tracheal model

W. Hofmann, I. Balásházy and L. Koblinger — 1161 The effect of gravity on particle deposition patterns in bronchial airway bifurcations

C. G. Deshpande and A. K. Kamra — 1169 Extension of atmospheric aerosols over ocean around peninsular India in the southwest monsoon season

Commentary

M. V. Buikov — 1175 Remarks on the paper "Condensational growth and removal of droplets"

News and other items

1177 Book Review

NUMBER 8

Regular papers

V. B. Storozhev — 1179 Estimation of the contribution of heterogeneous reactions on the surface of aerosol particles to the chemistry of the atmosphere

E. L. Zapadinsky, K. K. Sabelfeld, M. Kulmala, B. Z. Gorbunov and D. M. Rackimgulova — 1189 Heterogeneous nucleation in non-uniform media: numerical simulations

R. C. Brown and M. A. Hemingway — 1197 Electric charge distribution and capacitance of agglomerates of spherical particles: theory and experimental simulation

C. F. CLEMENT, R. A. CLEMENT and R. G. HARRISON 1207 Charge distributions and coagulation of radioactive aerosols

M. QUINTARD and S. WHITAKER 1227 Aerosol filtration: an analysis using the method of volume averaging

D. E. ROSNER, P. TANDON and A. G. KONSTANDOPOULOS 1257 Local size distributions of particles deposited by inertial impaction on a cylindrical target in dust-laden streams

P. GÖRNER, D. BEMER and J. F. FABRIÈS 1281 Photometer measurement of polydisperse aerosols

B. T. CHEN, H. C. YEH and B. J. FAN 1303 Evaluation of the TSI small-scale powder disperser

News and other items

1315 Abstracts of the Ninth Annual Conference of the Aerosol Society (U.K.)

1329 Announcement

i Volume Contents and Author Index for Volume 26 (1995)

SUPPLEMENT 1

ABSTRACTS OF THE 1995 EUROPEAN AEROSOL CONFERENCE

Preface xxxiii

Plenary Lecture 01

Aerosols and climatic change. J. HEINTZENBERG S1

Oral Session 02: Atmospheric I—Direct Effect of Aerosols

General circulation model simulations of the direct climatic effect of anthropogenic sulphate aerosols. D. L. ROBERTS and J. M. EDWARDS S3

Size distributions of sub-micron aerosols in the free troposphere and marine boundary layer of the sub-tropical North Atlantic. F. RAES, F. MCGOVERN and R. VAN DINGENEN S5

Boundary layer aerosol particles over the Atlantic Ocean: a study of their physicochemical properties related to sources and transport. R. VAN DINGENEN, M. MANGONI, F. RAES and J.-P. PUTAUD S7

The effect of boundary layer dynamics on marine CN/CCN production. V.-M. KERMINEN and A. S. WEXLER S9

Heterogeneous chemical processing of $^{13}NO_2$ at zero concentration by monodisperse carbon aerosols. K. TABOR, M. KALBERER, Y. PARRAT, E. WEINGARTNER, D. PIGUET, D. JOST, A. TÜRLER, H. W. GÄGGELER and U. BALTENSPERGER S11

Oral Session 03: Gas Cleaning I—Electrical Methods

Compositional penetration of pulverized coal combustion fly ash through the electrostatic precipitator. T. LIND, E. I. KAUPPINEN, T. VALMARI, N. KLIPPEL and C. MAURITZSON S13

Precipitation of fly-ash of different resistivity in a laboratory electrostatic precipitator. K. SCHMIDLE, H. BURTSCHER, N. KLIPPEL and S. STUTZ S15

Electrostatic precipitation of fine particulate contaminants by UV/photoelectron method under low pressure condition. T. SETO, K. OKUYAMA, Y. INOUE, S. YOKOYAMA, S. KUROSE, M. HIROSE and T. FUJII S17

Review of particle agglomeration. T. WATANABE, F. TOCHIKUBO, J. HAUTANEN and E. I. KAUPPINEN S19

Brownian agglomeration of bipolarly charged aerosol particles. J. HAUTANEN, T. WATANABE, T. TSUCHIDA, Y. KOIZUMI, F. TOCHIKUBO, E. KAUPPINEN, K. LEHTINEN and J. JOKINIEMI S21

Oral Session 04: Instrumentation I—Optical Measurement

Effect of multiple light scattering on optical concentration measurement in aerosols. D. FILIPOVICOVA, G. P. REISCHL, R. RUDOLF, W. W. SZYMANSKI, A. VRTALA and P. E. WAGNER S23

Construction of a multi-path cell for spectral analysis of the extinct light from ultrafine aerosol particles. A. GRAFF, F. OSLENDER and M. QUINTEN S25

Extended operational conditions for a redesigned optical particle counter with respect to lower detection limit and number concentration. H. UMHAUER, B. SACHWEH and F. EBERT S27

Determination of particle size distribution in flowing aerosols by photon correlation spectroscopy. R. WEBER and G. SCHWEIGER S29

Photon correlation spectroscopy for analysis of low concentration aerosols. A. W. WILLEMSE, M. A. VAN DRUNEN, I. L. TUINMAN, J. C. M. MARIJNISSEN, H. G. MERKUS and B. SCARLETT S31

Oral Session 05: Basics I—Nanoparticles and Ions

Penetration of ultrafine particles and ion clusters through wire screens. Y. KOUSAKA, M. ALONSO, H. ICHITSUBO and T. HASHIMOTO S33

Determination of interfacial adhesion energy for nanometer particles via penetration measurements. H.-C. WANG S35

Deposition of ions from laminar flow in circular tubes made of various materials. Y. OTANI, C.-M. YUN, T. TANAKA, H. EMI and N. NAMIKI S37

Peculiarities of predicted temperature dependence of nanometer particle mobilities. H. TAMMET S39

Acetone cluster ion mobilities. J. M. MÄKELÄ, V. JOKINEN, T. MATTILA, A. UKKONEN and J. KESKINEN S41

Plenary Lecture 06

Arctic aerosols: studies of atmospheric chemistry and geochemistry using size-classifying sampling. R. E. HILLAMO S43

Oral Session 07: Fuchs Memorial

Nicolai Albertowich Fuchs (1895–1995): aerosol scientist and humanist. K. R. SPURNY S45

Ultrafine particle charging probabilities in the size range below 10 nm. G. P. REISCHL, J. M. MÄKELÄ, R. KARCH and J. NECID S47

Bipolar corona charging and coagulation during flame synthesis of particles. S. VEMURY and S. E. PRATSINIS S49

Theory of the onset of dendrite formation. K. E. J. LEHTINEN, R. S. WINDELER and S. K. FRIEDLANDER S51

Morphology of soot agglomerates produced into high pressure high temperature environment as inferred by light scattering/extinction measurements. S. DI STASIO, P. MASSOLI and M. LAZZARO S53

In situ characterization and structure modification of agglomerated aerosol particles. A. P. WEBER, U. BALTENSPERGER, H. W. GÄGGELER and A. SCHMIDT-OTT S55

Inversion of personal inhalable dust spectrometer (PIDS) data. G. RAMACHANDRAN, E. W. JOHNSON and J. H. VINCENT S57

Phase transition in source enhanced condensing systems. A. A. LUSHNIKOV and M. KULMALA S59

Air filtration. A. A. KIRSCH and I. B. STECHKINA S61

Oral Session 08: Atmospheric II—Atmospheric Aerosols

Prediction of aerosol characteristics over eastern North America using a three-dimensional Eulerian model. F. S. BINKOWSKI and U. SHANKAR S63

On-line size and composition analysis of particles from ambient aerosols by laser mass spectrometry (LAMPAS). K.-P. HINZ, B. SPENGLER and R. KAUFMANN S65

Aerosol aircraft measurements during photosmog episodes over the Swiss Plateau and the Southern pre-Alpine region. A. M. HERING, A. S. H. PRÉVÔT, J. STAEHELIN, A. WALDVOGEL and G. L. Kok S67

Analysis of aerosol transport to Tahoe basin. T. A. CAHILL, T. RAUNEMAA, P. WAKABAYASHI and R. MATSUMURA S69

Bromine, sulfur and manganese source contribution characteristics in Eastern Baltic Sea and Atlantic Ocean aerosol as determined by PSCF calculations. T. Raunemaa, P. K. Hopke and A. Fan S71

Variability of aerosol concentration and the fine structure of aerosol size distribution. A. Mirme, E. Tamm and M. Fischer S73

Daily variation of the aerosol size distribution at a rural location in Southern Italy. F. Esposito, G. Pavese, F. Romano and C. Serio S75

The dynamic of the changes in the atmospheric aerosols near large industrial towns. N. S. Bufetov, K. P. Koutzenogii, V. I. Makarov and V. B. Baryshev S77

Dry deposition modelling of atmospheric aerosols from a lead smelting industry. A. D. Vaidya and R. S. Patil S79

Oral Session 09: Aerosols in Nuclear Reactor Accidents

General presentation of aerosol behaviour in the Phebus FPT0 test. C. Gonnier, B. Clement, Y. Garnier, R. Zeyen and B. Verot S81

Thermophoretic deposition in the first Phebus-FP experiment. P. Dumaz and S. W. Cho S83

Experimental studies on hygroscopic CsOH and CsI and inert Ag aerosol behavior in LWR containment conditions. J. M. Mäkynen, J. K. Jokiniemi, P. P. Ahonen, E. I. Kauppinen and R. Zilliacus S85

Aerosol deposition by diffusiophoresis in small pipes—TUBA programme. C. Boyer, T. Albiol and F. Sabathier S87

Leakage of aerosol through long horizontal capillaries. M. H. E. Ball, D. A. V. Morton and C. F. Clement S89

Particle retention mechanisms in bubbles: SPARC-BUSCA models comparison. M. J. Escudero, L. E. Herranz, J. Polo and V. Peyrés S91

Fine particle generation in thermal plasma for resuspension studies in the STORM project. A. Krasenbrink, A. Hautojärvi, R. Hummel and J. Bachler S93

Investigation of condensation phenomena with a combined sensor for fog and relative humidity, performed in the KAEVER facility. G. Poss, D. Weber, B. Fritsche, R. Zahoransky, E. Laile, W. Riedel and M. Knothe S95

Oral Session 10: Instrumentation II—Size Distribution, Characterization and Sampling

Nanoparticle size measurement with a particle growth system (PGS). A. Rebours, D. Boulaud and A. Renoux S97

New method for in-situ determination of ultrafine particle size distribution by particle heatup and analysis of thermal radiation. A. V. Filippov and P. Roth S99

On-line TOF-mass-spectrometry of aerosols: system characterisation. M. Weiss, P. J. T. Verheijen, J. C. M. Marijnissen and B. Scarlett S101

Inversion of electrical low pressure impactor data. U. TAPPER, M. MARJAMÄKI, M. MOISIO, E. I. KAUPPINEN and J. KESKINEN S103

Fast size distribution measurement system for combustion and pyrolysis experiments. M. MARJAMÄKI, M. MOISIO, K. PIETARINEN, J. KESKINEN, M. KYMÄLÄINEN, K. JANKA, R. BACKMAN and M. HUPA S105

A new personal monitor for real-time measurement of the inspirable, the thoracic, and the respirable fraction of the airborne dust. W. DUNKHORST, H. LÖDDING and W. KOCH S107

Sampling instrument for atmospheric gases and fine and coarse particles: a combination of a teflon virtual impactor and denuders. T. PAKKANEN, T. MÄKELÄ, R. HILLAMO, M. MÄKINEN and M. FERM S109

The Steam-Jet Aerosol Collector (SJAC). A. KHLYSTOV, G. P. WYERS, H. M. TEN BRINK and J. SLANINA S111

Development of measurement method of particle size distribution by anisokinetic sampling using two sampling probes of different diameter. H. TSUJI, H. MAKINO, M. KIMOTO, H. YOSHIDA and K. IINOYA S113

Plenary Lecture 11

Trace metals in combustion processes. A. SAROFIM N/A

Oral Session 12: Atmospheric III—Optical Properties of Atmospheric Aerosols

Column closure of measured and extrapolated optical depth. J. P. VEEFKIND, J. C. H. VAN DER HAGE, E. VISSER and H. M. TEN BRINK S115

Aerosol light-scattering in The Netherlands in 1994. H. M. TEN BRINK, A. WAIJERS-YPELAAN and J. P. VEEFKIND S117

Atmospheric aerosol specific scattering coefficient measurements—size and composition data. S. A. P. NYEKI and I. COLBECK S119

An estimation of the optical depth and the particle size distribution of atmospheric aerosols in the region of Mount Qomolangma in Tibet. F. LI and D. LU S121

Closure studies based on column and profile observations of Pinatubo-aerosol properties with sun photometer and Raman lidar. P. POSSE, W. VON HOYNINGEN-HUENE, A. ANSMANN, U. WANDINGER and J. REICHARDT S123

Oral Session 13: Combustion I—Soot

The growth of soot particles in atmospheric C_2H_4/air/O_2-flames with higher carbon densities of the fuel of $\rho_c > 5 \cdot 10^{-6}$ mol/cm^3. PH. CHAMBRION, H. JANDER and N. PETEREIT S125

Multiphoton ionization mass spectroscopy and size analysis of soot particles. H. HEPP, K. SIEGMANN, S. FRANK, N. MALINOWSKI and T. P. MARTIN S127

Structure of particles in combustion engine exhaust. H. BURTSCHER, S. KÜNZEL and CH. HÜGLIN S129

Spectroscopical characterisation of carbon-containing aerosols formed in rich premixed flames. A. D'Alessio, A. D'Anna, G. Gambi and P. Minutolo S131

Jet engine exhaust particulate characterization. D. E. Hagen, P. D. Whitefield and H. Schlager S133

Oral Session 14: Instrumentation III—Electrical Mobility

Classification of aerosol particles according to mass-to-charge ratio. K. Ehara, C. R. Hagwood and K. J. Coakley S135

Development of a batch type electrical mobility analyzer. Y. Kousaka, N. Fukushima, Y. Endo and S. Kasahara S137

Transfer function of the radial flow differential mobility analyser (RF-DMA). R. Gougeon, P. Armand, D. Boulaud and M. Pourprix S139

Numerical modeling of the performance of the differential mobility analyzer for nanometer aerosol measurements. D. Chen and D. Y. H. Pui S141

Convolution and its application to DMA transfer function measurements. F. Stratmann, D. Hummes, Th. Kauffeldt and H. Fissan S143

Oral Session 15: Aerosol Modelling

Three-dimensional lattice Boltzmann simulations of binary collisions between equal droplets. M. Schelkle and A. Frohn S145

Investigation of the influence of different parameters on the acoustic agglomeration process using a numerical simulation. G. Funcke and A. Frohn S147

Modeling of aerosol dynamics in a laminar flow reactor: a multicomponent 2-D bimodal approach. M. Wilck and F. Stratmann S149

Modelling and simulation of the multicomponent aerosols. N. Kourti S151

Numerical simulation of the kinetics of aerosol formation in the free molecular collision regime. K. K. Sabelfeld, K. P. Koutzenogii and A. I. Levykin S153

Oral Session 16: Atmospheric IV—Stratosphere

Aerosol formation in aircraft exhaust plumes. I. J. Ford, P. D. Whitefield and D. E. Hagen S155

Polar stratospheric clouds particles. J. Goodman, S. Verma, R. F. Pueschel and G. V. Ferry S157

Assessment of the physical state of stratospheric aerosols by use of emulsions in the construction of kinetic phase diagrams. K. Ji, J. B. Poirier and J. C. Petit S159

Simulations of type II polar stratospheric cloud formation. E. Batris, A. Laaksonen and M. Kulmala S161

Observations of depolarizing stratospheric aerosols by multispectral 2-polarization lidar during winter 1994/95. B. Stein, F. Immler, E. Kyrö, B. Mielke, V. Mitev, P. Rairoux, V. Rizzi, L. Stefanutti, C. Wedekind and L. Wöste S163

Stratospheric aerosol measurements with lidar and balloon at NyAlesund and Alaska. Y. Iwasaka, M. Fujiwara, T. Shibata, M. Hayashi, M. Nagatani, H. Adachi, T. Sakai, M. Watanabe and Y. Nakura S165

Oral Session 17: Combustion II—Inorganic Aerosols

The effect of boiler operating conditions on the composition, morphology, and microstructure of black liquor combustion aerosols. M. P. Mikkanen, E. I. Kauppinen, J. K. Jokiniemi, Q. Powell, A. S. Gurav, T. T. Kodas, A. D. Shah, F. E. Huggins and G. P. Huffman S167

Model for alkali salt aerosol formation and deposition in kraft recovery boilers. J. Jokiniemi, J. Pyykönen, P. Mikkanen and E. Kauppinen S169

Model of alkali release during black liquor combustion. C. L. Verrill and R. A. Wessel S171

The combustion of straw—submicron aerosol particles and gas pollutants. K. A. Christensen, M. Stenholm and H. Livbjerg S173

Aerosol dynamics in circulating fluidised bed combustion of biomass. T. Valmari, E. I. Kauppinen, J. Kurkela, G. Sfiris, A. Johansson and R. Zilliacus S175

Fragmentation of calcite in a simulated coal-flame. H. M. ten Brink, S. Eenkhoorn and G. Hamburg S177

Oral Session 18: Instrumentation IV—Generation and Measurement

Concentration and charge measurements of SiO_2- and latex-particles dispersed by the shock and expansion wave-driven aerosol generator. J. J. F. Strecker and P. Roth S179

The electrohydrodynamic atomization of liquids in the Delft Aerosol Generator. R. P. A. Hartman, S. Spijkers, J. C. M. Marijnissen and B. Scarlett S181

Residual particle generation in droplet spray systems. S. Heidenreich, S. Schabel, H. Büttner and F. Ebert S183

Characterization of the ECN high-flow turbulent cloud chamber. A. Khlystov, G. P. A. Kos, H. M. ten Brink, A. Berner and C. Kruisz S185

Development and evaluation of an aerosol monitor with low wind sensitivity and uniform filter deposition. S. A. Grinshpun, K. Willeke, S. Kalatoor and P. Baron S187

A new version of black smoke method. R. Hamilton, B. Gorbunov and M. Semenov S189

Oral Session 19: Basics II—Aerosol Chemistry

Characterization of individual aerosol particles by element mapping in electron probe microanalysis (EPMA). M. Wentzel, S. Weinbruch, M. Kluckner, P. Hoffmann and H. M. Ortner S191

Speciation of sulfur compounds in individual aerosol particles. K. R. NEUBAUER, M. V. JOHNSTON and A. S. WEXLER S193

The reaction of fractal soot aerosol with ozone. O. MÖHLER, K.-0H. NAUMANN, H. SAATHOFF and W. SCHÖCK S195

The influence of organic surface coatings on the optical properties of aerosols. I. COLBECK and B. ATKINSON S197

Influence of surfactant upon adsolubilization of hydrophobic organic compounds in fog droplets. J.-H. A. LO and W.-M. G. LEE S199

Transport and phototransformation of polychlorinated dibenzo-p-dioxins (PCDD's) on carbonaceous aerosol. P. D. WHITEFIELD, D. E. HAGEN, S. KAPILA, L. D. SIVILS and R. TILIO S201

Plenary Lecture 20

Condensation processes in aerosols. P. E. WAGNER S203

Oral Session 21: Atmospheric V—Aerosol Formation

Experimental studies of nucleation and growth in the free trophosphere. P. H. MCMURRY, R. WEBER, J. MARTI, F. L. EISELE, D. J. TANNER and A. JEFFERSON S205

Outbursts of nanometer particles in atmospheric air. U. HÕRRAK, J. SALM and H. TAMMET S207

Study of nucleation and growth of H_2O-H_2SO_4 aerosol particles in a controlled laminar photochemical flow reactor. B. ROTH, R. VAN DINGENEN and F. RAES S209

Experimental and theoretical study of photochemically-induced aerosol formation from SO_2. Comparison of two models. S. N. DUBTSOV, G. I. SKUBNEVSKAYA, M. KULMALA, K. K. SABELFELD and A. I. LEVYKIN S211

Comparison and consistency study of different nucleation theories. H. VEHKAMÄKI and M. KULMALA S213

Oral Session 22: Combustion III—Hazardous Materials

Trace element partitioning during coal gasification. J. J. HELBLE, W. MOJTAHEDI, J. LYYRÄNEN, J. JOKINIEMI and E. KAUPPINEN S215

Control of toxic metal emissions from combustors using vapor phase sorbent materials. P. BISWAS, T. M. OWENS and C. Y. WU S217

Trace elements in advanced power systems and hot-gas cleanup systems. T. A. ERICKSON, D. W. BREKKE and P. BOTROS S219

Sublimation of urea particles at high temperatures. G. N. SCHADING, C. C. M. LUIJTEN and P. ROTH S221

Kinetics of the photolytic formation of aerosols from SO_2 and NH_3 in stack plumes. P. S. CHRISTENSEN, H. RØJEL, S. WEDEL and H. LIVBJERG S223

Oral Session 23: Materials I—Application of Fine Particles

Nanoparticles for visualization, contrast enhancement and drug delivery in lymphatic targetting. P. J. KOLARI, P. MAARANEN, J. JOUTSENSAARI, S. RANNIKKO and E. KAUPPINEN S225

Aerosol-made titania for photocatalytic destruction of organics. G. P. FOTOU and S. E. PRATSINIS S227

Liquid flame spraying. J. TIKKANEN, V. PITKÄNEN, J. LARJO, J. KESKINEN, G. GRAEFFE, K. GROSS, W. SMITH, S. RAGHU, C. C. BERNDT and M. RAJALA S229

The influence of a magnetic field in magnetic particle production. TH. KAUFFELDT, H. LAKNER, A. LUCZAK and A. SCHMIDT-OTT S231

Electric properties of nanostructured micron-sized carbon wires fabricated by an aerosol process. B. SCHLEICHER and S. K. FRIEDLANDER S233

Oral Session 24: Basics III—Photon Induced Phenomena

Threshold of stimulated Raman scattering in microdroplets. R. VEHRING and G. SCHWEIGER S235

Monitoring particle coating via photoelectric activity and mobility change. W. FENDEL and A. SCHMIDT-OTT S237

Size dependent photo emission studies on aerosols determination of the electron escape depth. J. FAUL, H. BURTSCHER and K. SIEGMANN S239

The works of Michael Faraday related to aerosol science. J. W. GENTRY S241

Counterrunning-beams LDA in electrophoresis. V. I. JAKIMCHUK S243

Poster Session I 25: Basics—Aerosol Science

Non-isothermal droplet evaporation at arbitary Knudsen numbers. V. G. CHERNYAK S245

Criteria for droplet breakup while undergoing simultaneous evaporation and discharge. J.-C. LIN, Y.-C. CHANG and J. W. GENTRY S247

Thermodiffusiophoresis of DOP droplets in ternary gaseous mixtures DOP vapour-He-H_2. J. SMOLÍK, V. ŽDÍMAL and B. TŘÍSKA S249

On the effect of electric field upon the process of aerosol production from the surface of liquid jet. S. K. ASLANOV S251

Size distribution of submicron particles. M. KOCIFAJ and J. LUKÁČ S253

Time-dependent stimulated emission of glass microparticle. G. P. LEDNYEVA and L. G. ASTAFIEVA S255

Heat-disruption of aluminium particles irradiated by a CO_2 laser. L. G. ASTAFIEVA and A. P. PRISHIVALKO S257

Kinetic equations of Brownian particles. V. RUDYAK and I. ERSHOV S259

Stability of the Poiseuille flow of dispersed fluid with non-homogeneous particles distribution. V. RUDYAK, E. ISAKOV and E. BORD S261

Electrification of aircraft in aerosol flows with a solid disperse phase. L. T. CHERNYI S263

Electrocoagulation of aerosols in noncollinear electric and gravitational fields. L. T. CHERNYI, G. L. SEDOVA and N. L. VASIL'EVA S265

Orientation-frozen and coupled motion of nonspherical particles in vertical stagnation flows. D. BRODAY, M. SHAPIRO, M. FICHMAN and C. GUTFINGER S267

Factor analysis of aerosol size distributions. P. PAATERO, J. M. MÄKELÄ and V. JOKINEN S269

Evaporation of methanol droplet at high ambient temperatures. J. SCHWARZ, J. SMOLÍK, J. KUGLER and J. EGAMI S271

Transfer of aerosol particles in a stochastic medium with a temperature gradient. A. G. KUDRYAVTSEV and S. D. TRAYTAK S273

Acoustic agglomeration of redispersed flyash. PH. CAPÉRAN, J. SOMERS and K. RICHTER S275

Acoustic agglomeration of titanium dioxide aggregates as a function of acoustic power. PH. CAPÉRAN, J. SOMERS, K. RICHTER and S. FOURCAUDOT S277

Influence of particle size and concentration, flow rate and precipitation density of aerosol on amount of insecticide deposited on larvae of gypsy moth. O. V. CHANKINA, K. P. KOUTZENOGII, V. I. MAKAROV, E. I. KIROV, V. M. SAKHAROV and G. N. ZAGULYAEV S279

Singular size distributions in coagulating systems: a perturbative approach. A. A. LUSHNIKOV S281

Mass spectrum of condensing fractals. A. A. LUSHNIKOV S283

Experimental study of polymerization reactions on optically levitated micro-particles by Raman spectroscopy. C. ESEN, T. KAISER and G. SCHWEIGER S285

Theoretical model of liquid aerosol particles deformation and shattering by high intensive laser radiation. YU. E. GEINTS and A. A. ZEMLYANOV S287

Geometrical optics approximation for coefficients of expansion of phase function in Legendre polynomials. A. A. KOKHANOVSKY S289

Chains of spherical fine particles. K. DEPPERT, K. GEORGSSON, H. LINKE, J.-O. MALM, P. OMLING and L. SAMUELSON S291

On the evaporation behavior of fine and ultrafine gallium particles. K. DEPPERT and L. SAMUELSON S293

Drag force in polydisperse row of parallel cylinders. A. L. CHERNJAKOV, M. N. LEBEDEV, I. B. STECHKINA and A. A. KIRSCH S295

Field-diffusion unipolar ion charging of fine particles. V. A. Puzakov and A. A. Kirsch S297

Bimodal unipolar coagulation: a comparison of two modelling approaches. E. Otto, C. Janzen, S. Vemury, S. E. Pratsinis and H. Fissan S299

Aerosol chargers using radioactive sources and electric field collinear to flow: theory and experiment for electropositive nitrogen and electronegative air. A. V. Zagnitko, S. V. Fomichev, N. M. Trotsenko and V. N. Prusakov S301

Poiseuille aerosol flow and fine structure of LDA spectrum. V. I. Jakimchuk, N. Kh. Kopyt, M. D. Marinashvili and Dz. V. Melkonyan S303

LDA-technique application to investigation of vortex ring internal structure with moderate thickness core. A. I. Struchayev and V. I. Jakimchuk S305

Aerosols transport effectiveness of vortex rings. A. I. Struchayev S307

Quasielastic light scattering by anisotropic macroparticles. E. A. Manykin S309

The inelastic light scattering from the shape motion of a liquid droplet: the history and the status. E. A. Manykin and P. P. Poluektov S311

Photophoresis of model macroscopic particles. A. I. Bogolepov, P. E. Suetin and G. P. Bystrai S313

The burning and spontaneous extinction of carbon particle in the laser radiation field. V. V. Kalinchak, S. G. Orlovskaya and A. V. Mandel S315

A comparison of thermophoresis in a laminar flow under gravity and micro-gravity conditions. W. Oostra, J. C. M. Marijnissen, B. Scarlett and D. Bryant S317

Small air ions as precursors of aerosol particles. T.-E. Parts S319

Thermoemissional charging of a spherical sedimentary particle. A. V. Suslov, L. A. Lyalin and K. I. Semionov S321

On the effect of volatility on thermophoresis of aerosols. S. P. Bakanov S323

Diffusion of radon daughters in laminar tube flow. J. Malet, N. Montassier, D. Boulaud and A. Renoux S325

Peculiarities of drop's electrization during break-up of low-concentration salt solutions. A. V. Kolpakov, E. I. Titova and L. V. Maliarova S327

Poster Session I 26: Nucleation

Photonucleation of thriethylamine vapors in the air and argon. G. I. Skubnevskaya, E. N. Dul'tsev and S. N. Dubtsov S329

Numerical simulation of embryo evolution in supersaturated vapor. D. I. Zhukhovitskii S331

Small ion mobilities during particle formation from irradiated SO_2 in humid air. J. M. Mäkelä, V. Jokinen and M. Kulmala S333

Curvature correction for surface tension of ice. A. Bogdan and M. Kulmala S335

Laminar flow tube reactor (laminar flow diffusion chamber) designed for binary photo-induced nucleation studies. Test for the homogeneous nucleation of dibutylphthalate (DBP). V. B. Mikheev and N. S. Laulainen S337

Computer simulation of homogeneous nucleation in gaseous medium. I. V. Kazakova and G. V. Gadiyak S339

Monte Carlo simulations on the cluster on the crystal aerosol particle Helmholtz free energy calculations. E. Zapadinsky and M. Kulmala S341

A stochastic model for studying the structure of the supersaturation fluctations in highly turbulent flows. K. K. Sabelfeld and M. Kulmala S343

Evolution of mobility spectrum of charged nanometer particles in case of vapour nucleation and condensation. M. Noppel S345

Poster Session I 27: Atmospheric Aerosols

Inner-seasonal factors of variability of submicron aerosol optical characteristics. S. A. Terpugova, M. V. Panchenko, A. G. Tumakov and E. P. Yausheva S347

On the estimate of aerosol mixing layer height on the base of correlation of aerosol scattering coefficient. S. A. Terpugova and M. V. Panchenko S349

Physical characteristics of noncondensation aerosol clouds. B. D. Belan, M. V. Panchenko, G. O. Zadde and V. E. Zuev S351

Aerosol distribution over the Baikal Lake. B. D. Belan, M. V. Panchenko and G. N. Tolmachev S353

Microscale inhomogeneities of atmospheric aerosols. B. D. Belan S355

The splitting of accumulation mode in atmospheric aerosols: a time scale analysis. V.-M. Kerminen and A. S. Wexler S357

Determination of the axially symmetric elongated particles orientation from data of polarization sounding. R. F. Rakhimov and D. N. Romashov S359

On the fine structure in spectral and altitude behavior of the opto-microphysical characteristics of stratospheric aerosol. R. F. Rakhimov S361

The spectral structure of aerosol extinction coefficients in the ground layer of the atmosphere in arid zone. Yu. A. Pkhalagov, V. N. Uzhegov and N. N. Shchelkanov S363

Greenhouse warming versus aerosol cooling in the context of global climate change: contribution of satellite observations. K. Ya. Kondratyev S365

Lidar investigation of highway aerosol. A. D. Egorov, A. A. Sinkevich and V. D. Stepanenko S367

Field investigations of aerosol scavenging by precipitation. Yu. A. Dovgalyuk, I. A. Molotkova, E. V. Orenburgskaya, Yu. F. Ponomarev, A. A. Sinkevich, D. D. Stalevich, E. N. Stankova and V. D. Stepanenko S369

Investigations of hygroscopical properties of atmospheric aerosol particle. S. TRAKUMAS, A. JUOZAITIS, G. BUZORIUS, A. GIRGŽDYS and V. ULEVIČIUS S371

Determination of climate-relevant aerosol properties of Pinatubo event by sun and sky radiometer. P. POSSE and W. VON HOYNINGEN-HUENE S373

Aerosol chemistry in the urban atmosphere of São Paulo, Brazil. A. G. ALLEN and A. H. MIGUEL S375

Aerosol measurements in Siberia. P. K. KOUTSENOGII, N. S. BOUFETOV, E. I. KIROV, V. I. MAKAROV and S. I. SHUISKI S377

Automated aerosol-denuder complex for continuous measurement size distribution aerosol and determination $(NH_4)_2SO_4$, H_2SO_4, NH_4NO_3, HNO_3 and NO, NO_2, O_3, SO_2 in atmospheric and aerosol. P. WYERS, H. TEN BRINK, M. BRANDSMA, A. KHLYSTOV, A. N. ANKILOV, N. M. BAZHIN, A. M. BAKLANOV, S. I. EREMENKO and S. E. PASHENKO S379

Continuous measurements of size distribution atmospheric aerosol, $(NH_4)_2SO_4$, H_2SO_4, NH_4NO_3, HNO_3 and NO, NO_2, SO_2, O_3 near Novosibirsk in 1994–1995. P. WYERS, H. TEN BRINK, M. BRANDSMA, A. KHLYSTOV, A. N. ANKILOV, A. M. BAKLANOV, N. M. BAZHIN, S. I. EREMENKO and S. E. PASHENKO S381

Sampling and analysis of atmospheric fog in the surburban area of a severely polluted city. W.-M. G. LEE and J.-L. YEH S383

Outdoor concentrations of PM_{10} and particulate PAHs at an urban road. M. KARRER, CH. MONN and H.-U. WANNER S385

Long-time measurement results on atmospheric aerosol number concentrations. A. GIRGŽDYS, R. GIRGŽDIENĖ and A. JUOZAITIS S387

Variability of aerosol optical properties over Hefei during the period from September 1993 to September 1994. J. ZHOU, Z. WANG, J. HAN and H. HU S389

Determination of 1-nitropyrene in airborne particulate matter with enzyme-linked immunosorbent assay (ELISA). J. ZÜHLKE, D. KNOPP and R. NIESSNER S391

Intercomparison study on soot-selective methods—field study results from several polluted areas in Germany. A. PETZOLD and R. NIESSNER S393

The influence of sample presentation on the experimental determination of uptake coefficients: application to the reactions of gaseous $ClONO_2$, N_2O_5, and HNO_3 with NaCl. F. F. FENTER, F. CALOZ and M. J. ROSSI S395

Effects of air pollutants (PAN, nitrogen oxides, sulfur dioxide, ozone, chlorine and fluoride) on the plants. F. HALEK S397

Measurement of carbon monoxide in Tehran's atmosphere. F. HALEK S399

Determination of microstructure and optical characteristics of stratospheric aerosol using ground-based lidars. E. V. MAKIENKO S401

On the highly dispersed aerosol pollution of the atmosphere. K. M. MERZHANOV S403

Detection of charged dust particles in the summer mesopause. O. HAVNES, J. TRØIM, W. MORTENSEN, L. NAESHEIM, B. SCHLEICHER and T. TØNNESEN S405

Heterogeneous halogen activation: interconversion reactions for $ClNO_2$. W. BEHNKE, A. FRENZEL, CH. GEORGE, V. SCHEER and C. ZETZSCH S407

A station for forest ecological and atmospheric chemical measurements in Värriö. T. AHONEN, P. AALTO, Ü. RANNIK, T. VESALA, M. KULMALA, P. HARI and T. POHJA S409

Nucleation events on the Värriö environmental measurement station. P. AALTO, M. KULMALA and E. D. NILSSON S411

The effect of HCl on cloud droplet formation. M. KULMALA, P. KERONEN, A. LAAKSONEN, T. VESALA and P. KORHONEN S413

Measurements of trace gases with a closed-path FT-IR analyzer. P. KERONEN, J. RÄSÄNEN, M. KULMALA, P. HARI and A. UUSI-RAUVA S415

Simulating the formation events of H_2SO_4-H_2O particles. M. KULMALA, H. HIRVONEN and L. PIRJOLA S417

Comparison of five methods for measuring ammonium aerosol. E. M. VAN PUTTEN and M. G. MENNEN S419

Diurnal variations of submicron aerosol and black carbon in traffic environment at temperature range from −30 to +5°C. J. SURAKKA, A. MIRME, E. PÄRJÄLÄ and J. RUUSKANEN S421

Identifying and quantifying air pollution sources in Kuopio by receptor modeling. H. HOSIOKANGAS, Ü. KIKAS, J. PEKKANEN, J. RUUSKANEN and H. TAMMET S423

The influence of industrial pollution of the atmosphere on atmospheric aerosol ice-forming potential. N. O. PLAUDE and M. V. VYCHUZHANINA S425

Non linear effects of spaced distribution of solar radiation attenuation by aerosol. R. H. FAHRUTDINOV, G. M. TEPTIN and L. V. MOROZOVA S427

Characterization of atmospheric aerosols according to atmospheric-electric measurements. U. HÕRRAK, J. SALM and H. TAMMET S429

Size distributions of evaporating falling raindrops. C. F. CLEMENT and R. A. CLEMENT S431

Laboratory investigations of aerosol scavenging. A. A. SINKEVICH, D. YU. AFANASJEV and T. A. PERSHINA S433

The growth of atmospheric particles in moist air. B. BUSCH, G. FERRON, E. KARG, A. SILBERG and J. HEYDER S435

Mass medium diameter of airborne particulate substances in dependence of specific vapour pressure. J. MÜLLER S437

Scavenging of SO_2 and NH_3 on ice surface during diffusion growth. G. SANTACHIARA, S. SIVANESAN, T. GEORGIADIS and F. PRODI S439

Chemical composition and source allocation of ambient aerosol particles collected by a PM10 high-volume sampler—a case study in Taiwan. C.-S. YUAN S441

Mass size distributions for atmospheric particulate elements at the Zeppelin station in Spitsbergen. W. MAENHAUT, V. HAVRÁNEK, G. DUCASTEL and J. E. HANSSEN S443

Photoreduction of iron oxyhydroxides in the presence of halogenated acetic acids: implications for tropospheric chemistry. S. O. PEHKONEN, R. L. SIEFERT and M. R. HOFFMANN S445

Variations of cloudwater ion concentrations due to HNO_3 condensation at low water vapour supersaturations. P. KORHONEN, M. KULMALA and Y. VIISANEN S447

Lead-210 and smoke shade in Southern Finland air 1976–1993. J. PAATERO and R. MATTSSON S449

Three-wavelength nephelometer measurements in the Finnish Arctic. A. VIRKKULA and R. E. HILLAMO S451

Aerosol lidar studies at a tropical Indian urban station. P. C. S. DEVARA, P. E. RAJ, S. SHARMA and G. PANDITHURAI S453

Measurements of hygroscopic mass increase of deposited aerosol samples—comparison to theory. R. HITZENBERGER, U. DUSEK and A. BERNER S455

The joint Russian-German airborne research project 'Arctic Haze' 1993–1995. R. JAENICKE, W. JAESCHKE, V. KHATTATOV, U. LEITERER and R. MASER S457

Composition of mineral aerosols from Amsterdam Island (37°S-77°E) and New Zealand (150°E-45°S). U. EZAT, C. E. LAMBERT and F. DULAC S459

Studies of aerosols spreading in the near-boundary layer in the Southern Pribaikalye atmosphere. T. V. KHODGER, V. A. OBOLKIN, V. K. ARGUCHINTSEV, V. L. MAKUKHIN and V. L. POTEMKIN S461

Formation of ammonium chloride particles from hydrogen chloride and ammonia in the atmosphere. M. KULMALA, J. MÄKELÄ, T. W. CHOULARTON, A. WIEDENSOHLER and H.-C. HANSSON S463

Redistribution of NH_4NO_3 within a system of $(NH_4)_2SO_4$- and NH_4NO_3-particles. Part 1: Modelling. H. BUNZ, M. KOYRO, O. MÖHLER and H. SAATHOFF S465

Depth-resolved chemical characterisation of atmospheric aerosol particles sampled in the upper Rhine valley. F. FAUDE and J. GOSCHNICK S467

Recognition and quantification of particulate pollutant sources by secondary mass spectrometry. J. GOSCHNICK, C.-J. HÄCKER and H.-J. ACHE S469

Study of the air pollution propagation by synchronized monitoring of atmospheric aerosols. E. TAMM and M. VANA S471

Speciation of particulate organic matter in arctic aerosols. P. MASCLET and V. HOYAU S473

On composition distribution of atmospheric aerosols. Yu. S. Lyubovtseva S475

Size distributions of inorganic ionic compounds in aerosols collected at Svalbard Islands. R. E. Hillamo, P. Masia, I. Allegrini, R. Sparapani and M. Montagnoli S477

Dynamic of atmospheric pollution in industrial centers of Belarus. A. S. Skaptsov and V. N. Tsap S479

Characteristics of aerosols of atmospheric boundary layer over Moscow. A. K. Budyka, B. I. Ogorodnikov and V. I. Skitovitch S481

Concentration of large condensation nuclei during the aeroplane sounding of atmosphere above Barents and Kara seas in 1976–1985. B. F. Sadovsky, A. G. Sharapov and B. I. Ogorodnikov S483

Characterization of atmospheric aerosols in the vicinity of coal handling and storage areas. Y.-M. Kuo and C. Wang S485

Phenomenon of discreteness at the formation of aerosol deposits in fiber filters. I. Tashpolotov and B. F. Sadovskii S487

The noncontact method for investigation of cloud-radiation interaction. M. A. Iordanskiy, B. V. Zudin, V. A. Lebedev and A. V. Andronova S489

The particle size distribution of water aerosol which forming in fighting a forest fire by aeroplane. N. A. Gusev, I. A. Nevskiy and Yu. I. Obvintsev S491

Size distributions of sulphate in the Mediterranean summer atmosphere. R. E. Hillamo, V.-M. Kerminen, P. Masia and I. Allegrini S493

Possible source-regions of pollutants in the Arctic: long-range air mass transport to the Russian Arctic. A. A. Vinogradova S495

Aqueous S(IV) oxidation in the presence of atmospheric aerosol particles: effect of organic ligands on Fe-catalyzed oxidation of S(IV). I. Grgić, A. Dovžan, M. Novič and V. Hudnik S497

Inorganic ions and ion balance in atmospheric aerosol in the Finnish Arctic. M. Mäkinen, A. Virkkula, T. Pakkanen and R. Hillamo S499

On the difference in the elemental composition of aerosol collected at coastal and inland Finnish EMEP stations. L. Jalkanen and T. Raunemaa S501

Elemental composition of fine aerosol in remote Rautavaara. T. Raunemaa, T. A. Cahill, P. Wakabayashi, K. Kuuspalo, T. Ålander, K. Järvinen and K. Kortelainen S503

Size distributions of ionic species in the aerosol in Greenland. M. Mäkinen, T. Mäkelä, R. Hillamo, J. L. Jaffrezo, W. Maenhaut and M. Bergin S505

Comparison of hazardous air pollutants in metropolitan and petrochemical industrialized area. P.-C. Chiang, Y.-C. Chiang, C.-F. Wang and S.-C. Chang S507

An assessment of the relevance of soot aggregate humidity cycling in the atmosphere. S. Nyeki and I. Colbeck S509

Poster Session I 28: Indoor Aerosols

Aerosol particle distribution analysis of lavatories' environment with floor exhaust ventilation. K. C. Chung and C. Y. Lee S511

Micro-analysis of museum aerosols to elucidate the soiling of paintings. L. A. De Bock, R. E. Van Grieken and D. Camuffo S513

Comparison of indoor and outdoor concentrations of PM-10 and PM-2.5. Ch. Monn, A. Fuchs, D. Kogelschatz and H.-U. Wanner S515

Migration of ambient aerosol into indoor environment in Upper Silesia, Poland. J. S. Pastuszka, R. L. Górny and D. Lis S517

Particle size specific indoor/outdoor measurements. C. Lange and J. Roed S519

Poster Session I 29: Health Related Aerosols

Monitoring of integrated human exposure to aerosols in an industrial area. M. M. Kulkarni and R. S. Patil S521

Evaporation kinetics of pesticide constituent from the mixture of polydisperse multicomponent aerosol. Y. N. Samsonov, V. I. Makarov and K. P. Koutzenogii S523

Mathematical models of the optimization of aerosol technology of plant protection. K. P. Koutzenogii and V. F. Raputa S525

A numerical study of the air flow around a person standing in front of an exhaust opening. S. J. Dunnett S527

Sizing and filtration of microbiological aerosols. D. Wake, A. C. Redmayne, A. Thorpe, J. R. Gould, R. C. Brown and B. Crook S529

Chemical characteristics of stainless steel welding fumes. D. S. S. Narayana, A. R. Sundararajan, B. Manjula, S. C. V. Kumari and V. Subramanian S531

The effect of various morphometric scaling procedures on inhaled particle deposition patterns. W. Hofmann, L. Koblinger and R. Bergmann S533

Ultrafine particle deposition in human and rat bronchial airway bifurcations. I. Balásházy, W. Hofmann and T. Heistracher S535

Measurement of the hygroscopicity of pharmaceutical aerosols in situ. S. Seemann, B. Busch, G. A. Ferron, A. Silberg and J. Heyder S537

Effects of insecticide aerosols on insects of grassland ecosystems. A. A. Alekseev, E. I. Kirov and I. B. Knorr S539

Transport of aerosol deposits at the active surface of liquid layer. T. R. Sosnowski, L. Gradoń and A. Podgórski S541

Study of the inorganic ion conveyance in aerosols. F. Clanet and S. Ducos-Fonfrede S543

Seasonal variation of primary biological aerosol particles. S. Matthias-Maser, K. Peters and R. Jaenicke S545

Plenary Lecture 30

Chemical aspects of aerosol synthesis of inorganic materials. M. J. Hampden-Smith and T. T. Kodas S547

Oral Session 31: Atmospheric VI—Hygroscopicity

Particle formation and transformation in continental air masses. H.-C. Hansson S549

Redistribution of NH_4NO_3 within a system of $(NH_4)_2SO_4$- and NH_4NO_3-particles. Part 2: Experimental. H. Saathoff, H. Bunz, O. Möhler and W. Schöck S551

Humidity dependence of the light-scattering by ammonium nitrate. H. M. ten Brink and J. P. Veefkind S553

Investigations of aerosol particle growth rate in the atmosphere. A. Juozaitis, S. Trakumas, A. Aštrauskas, A. Girgždys and V. Ulevičius S555

Oral Session 32: Materials II—Titania

Coating of TiO_2 with metal oxides by gas-phase reactions. Q. H. Powell, G. P. Fotou, T. T. Kodas and B. Anderson S557

Characterization of nanophase titania particles processed in different flame reactors. G. Yang and P. Biswas S559

The role of reactant mixing on the characteristics of flame-made agglomerates. S. E. Pratsinis and W. Zhu S561

Modeling on formation of ultrafine titanium dioxide particles by gas phase reaction. H. D. Jang, S. K. Kim and Y. S. Han S563

Generation of very fine solid particles by vapor desublimation in a gaseous mixture. M. Kodde and D. Mewes S565

Oral Session 33: Radioactive Aerosols

Natural and anthropogenic resuspension as factors of secondary airborne contamination near Chernobyl. W. Holländer and K. H. Junker S567

Studies of physical and chemical properties of aerosols—radionuclides carriers. G. Lujanienė and V. Lujanas S569

Electrical behaviour of radioactive aerosol in the environment. C. F. Clement and R. G. Harrison S571

Investigation of changes of radionuclide carrier properties. B. I. Ogorodnikov, G. A. Lujaniene, A. K. Budyka, V. I. Skitovich and V. J. Lujanas S573

A novel method to study radon and radon progeny emanation from water. T. Raunemaa, P. K. Hopke and K. Kuuspalo S575

Oral Session 34: Basics IV—Resuspension and Generation

Experimental verification of scaling laws for electrospraying. D. CHEN and D. Y. H. PUI S577

Resuspension of small particles by turbulent flow. M. LAZARIDIS and Y. DROSSINOS S579

Particle resuspension from tube surfaces. M. XU, R. UDISCHAS and H.-C. WANG S581

Determination of aerosol release energies provided by bubbles resting at liquid surfaces by means of the code RESUS. J. STARFLINGER, M. K. KOCH, U. BROCKMEIER, W. SCHÜTZ and H. UNGER S583

Generation of aerosol particles during the destruction of xylene, and trichloroethylene from air stream by a pulse corona discharge. H. KOHNO, M. TAMURA, S. HONDA, A. SHIBUYA, T. YAMAMOTO, A. A. BEREZIN and J. S. CHANG S585

Oral Session 35: Atmospheric VII—Arctic

Non-sea-salt sulfate, methanesulfonate and selected elements in atmospheric aerosols at Homer, Alaska. W. MAENHAUT, K. BEYAERT and G. E. SHAW S587

Spatial and seasonal variations of atmospheric aerosol concentration in Alaska. A. V. POLISSAR, P. K. HOPKE, W. C. MALM and J. F. SISLER S589

German-Russian Arctic Haze Projects: vertical profiles of aerosol integral parameters in spring and summer and derived size distributions. V. DREILING and R. JAENICKE S591

Correlation between particle number concentrations and sulphur dioxide concentrations in the Finnish Arctic. A. VIRKKULA, R. E. HILLAMO and V.-M. KERMINEN S593

Natural sulphur compounds in atmospheric aerosol in Finnish Arctic. M.MÄKINEN, R. HILLAMO, A. VIRKKULA and T. PAKKANEN S595

Distribution of coarse nitrate aerosol between sea salt and soil particles. T. PAKKANEN, R. HILLAMO, M. MÄKINEN, T. MÄKELÄ and V.-M. KERMINEN S597

Oral Session 36: Materials III—Spray Pyrolysis and CVD

Aerosol dynamics of metal ruthenate particle formation by spray pyrolysis. A. S. GURAV, T. T. KODAS, M. J. HAMPDEN-SMITH, P. AHONEN and E. I. KAUPPINEN S599

Preparation of aluminium doped zinc oxide particles by chemical vapor deposition. T. SETO, K. OKUYAMA and A. HIROTA S601

Aerosol-assisted chemical vapor deposition (AACVD) of binary films of Ag-Pd, Cu-Pd and Ag-Cu alloys, ZnS and SnO_2: the role of precursor chemistry. C. XU, M. NYMAN, J. CARUSO, M. J. HAMPDEN-SMITH and T. T. KODAS S603

Preparation of fine silver particles by decomposing droplets produced from filter expansion aerosol generator. S. B. PARK and Y. C. KANG S605

On-line Raman spectroscopy during laser-CVP of Si_3N_4 powders. I. L. TUINMAN, J. C. M. MARIJNISSEN, B. SCARLETT and J. SCHOONMAN S607

Ultrafine Pb-Ti-O particles synthesized from suspensions by the spray-ICP technique. M. KAGAWA and Y. SYONO S609

Oral Session 37: Health Related Aerosols

Particle density of sulfite and sulfate test aerosols. E. KARG, J. UHL and J. HEYDER S611

Electrical simulation of aerosol deposition in lungs. A. REINART and H. TAMMET S613

The significance of secondary flows for localized particle deposition in bronchial airway bifurcations. T. HEISTRACHER, I. BALÁSHÁZY and W. HOFMANN S615

Stochastic model of particle deposition and mucociliary clearance in human bronchial airways. L. KOBLINGER and W. HOFMANN S617

Physical and mathematical modelling of fiber deposition in the lower parts of the lung. Y. ZHOU, J. C. M. MARIJNISSEN, S. M. LEMKOWITZ and H. B. BIBO S619

Production of coated and monodisperse pharmaceutical aerosols. S. SEEMANN, G. A. FERRON, R. NIESSNER, K. WILLEKE and J. HEYDER S621

Oral Session 38: Basics V—Nucleation

Phenomenology for binary nucleation. A. LAAKSONEN and D. W. OXTOBY S623

Critical supersaturations of n-propanol vapor in helium. Effect of the total pressure. V. ŽDÍMAL, J. SMOLÍK and H. UCHTMANN S625

Effective one-component theory of binary nucleation. V. I. KALIKMANOV and M. E. H. VAN DONGEN S627

Enhancement of water droplet formation by *n*-alcohol vapors. Y. VIISANEN, R. STREY and P. E. WAGNER S629

Homogeneous nucleation of DBP vapour in a laminar flow diffusion chamber: the carrier gas effect. K. HÄMERI, M. KULMALA and E. RANTANEN S631

Measurement of particle nucleation and growth in low pressure chemical vapor deposition systems with the particle beam mass spectrometer. P. J. ZIEMANN, P. LIU, S. NIJHAWAN, D. B. KITTELSON, P. H. MCMURRY and S. A. CAMPBELL S633

Poster Session II 39: Fuchs Memorial

On the mechanics of fibrous aerosols. K. R. SPURNY S635

Detection and characterization of alkali salt particles using surface ionization techniques. U. JÄGLID, J. G. OLSSON and J. B. C. PETTERSSON S637

Aerosols clouds and fluctuations in the atmosphere. C. F. CLEMENT S639

Poster Session II 40: Modelling of Complex Dynamical Process

The homogeneous equilibrium approximation in heavy gas dispersion models. J. KUKKONEN, J. NIKMO, T. VESALA, M. KULMALA, D. M. WEBBER and T. WREN S641

Stochastical coagulation equation in the Poisson representation. V. V. RYAZANOV and S. G. SHPYRKO S643

A lognormal model to describe bipolar coagulation. E. OTTO, F. STRATMANN and H. FISSAN S645

The motion of ultrafine aerosol into rectangular channel. I. A. SHKEL and A. S. SKAPTSOV S647

Discretization of aerosol distributions for simulation of coalescence and breakage with sinks and sources. S.-H. CHENG, J.-C. LIN, N.-C. LIU, J. O'CONNELL and J. W. GENTRY S649

Poster Session II 41: Combustion

Electric field influence on nitrogen oxides emission in laminar diffusion flames. A. B. VATAZHIN, V. A. LIKHTER, V. A. SEPP and V. I. SHULGIN S651

Corona discharge in the combustion products. A. B. VATAZHIN, V. A. LIKHTER, V. A. SEPP and V. I. SHULGIN S653

Emission fluxes of heavy metals from the fluidized bed combustion of fossil fuels. J. SMOLÍK, M. HARTMAN, I. SÝKOROVÁ and J. KUČERA S655

Structure and inertial characteristics of clusters formed by condensed water particles in turbulent air-stream jets. A. B. VATAZHIN, V. A. LIKHTER and V. I. SHULGIN S657

Diesel exhaust particle size distribution measurements under dynamic conditions. U. PANNE, A. PETZOLD and R. NIESSNER S659

Multiphoton ionization mass spectroscopy of soot, PAH and fullerenes: the effect of photon energy. K. SIEGMANN, H. HEPP, S. FRANK, N. MALINOWSKI and T. P. MARTIN S661

Measurement of flame propagation in planar droplet arrays. K. ANDERS, A. FROHN, A. KARL and N. ROTH S663

The structure of fullerene soot particles. N. N. BELOV, K. D. NADEZHDIN, N. G. SHIRINA, G. A. CHERNAEVA, N. S. KAMUSHEVA and I. V. SUKHOV S665

Growth and structural changes of combustion aerosols at high relative humidity. E. WEINGARTNER, U. BALTENSPERGER and H. BURTSCHER S667

Field study of vehicle emission factors in a road tunnel. E. WEINGARTNER, C. KELLER, W. A. STAHEL, U. BALTENSPERGER and H. BURTSCHER S669

Gas to particle partitioning of PAHs in wood combustion exhaust. CH. HÜGLIN, L. SCHERRER, CH. GAEGAUF and H. BURTSCHER S671

Fine silica from included quartz in pulverized-coal combustion. H. M. TEN BRINK, S. EENKHOORN and G. HAMBURG S673

Real time size distribution monitoring of power plant particle emissions. M. MOISIO, M. MARJAMÄKI, J. KESKINEN, T. VALMARI and E. I. KAUPPINEN S675

Modelling deposition on diesel engine exhaust valves. J. PYYKÖNEN, J. LYYRÄNEN, J. JOKINIEMI and P. SVAHN S677

The burning and extinction of aerosol of carbon particles. S. G. ORLOVSKAYA, V. V. KALINCHAK, A. I. KALINCHAK and A. V. MANDEL S679

Liquor-to-liquor differences in combustion and gasification processes: alkali release and fume formation. R. BACKMAN, M. HUPA and L. SÖDERHJELM S681

Simulation of waste combustion for determining the reactions of mercury with hydrogen chloride. P. A. HORNE and P. T. WILLIAMS S683

Design and testing of a sampling station for measurement of particulate emissions from combustion sources. J. J. RODRÍGUEZ-MAROTO, F. J. GÓMEZ-MORENO, M. MARTÍN-ESPIGARES and L. A. BAHILLO-RUÍZ S685

Equilibrium modelling of trace element behaviour in fluidized bed combustion and gasification of coal. J. LYYRÄNEN, J. JOKINIEMI, W. MOJTAHEDI and J. KOSKINEN S687

Mathematical description of internal processes at detonation combustion of aerosol. A. G. GIRIN S689

Statistical description of ionization state in combustion aerosols. V. I. MARENKOV S691

A laboratory study of alkali metal salt aerosol formation in black liquor combustion. W. J. FREDERICK, V. V. REIS, K. J. WÅG and K. IISA S693

Poster Session II 42: Contamination Control

Experimental determination of the contamination probability in a Bottelpack machine. W. HOLLÄNDER and H. WINDT S695

Turbulent transport of submicron particles onto a free-standing wafer at low Reynolds number flows. K. GARTZ, F. SCHMIDT and H. FISSAN S697

Poster Session II 43: Aerosols in Nuclear Reactor Accidents

Development of the aerosol behavior code MACRES and FALCON experimental analyses. K. AKAGANE, M. HIMI and K. OKAMOTO S699

Experimental study of aerosol reentrainment from flashing pool during controlled filtered venting of the containment after a severe core melt accident. M. MÜLLER and PH. R. VON ROHR S701

Present status of the STORM project. A. HAUTOJÄRVI, J. BACHLER, R. HUMMEL, W. SCHULZE, J. A. CAPITÃO and G. DE SANTI S703

Aerosol behaviour in small vessels: an interpretation of FAL-ISP-1 test by using CONTAIN code. L. E. HERRANZ and J. POLO S705

Measurements of aerosol deposition in highly turbulent pipe flow: DEPAT programme. V. SALDO, F. SABATHIER and T. ALBIOL S707

Analysis of AERODEVAP experiments with SOPHAEROS computer code. I. DROSIK, F. MARTIN and P. DUMAZ S709

Electron microscopy analysis of aerosols from the Phebus FPTO instrumentation. B. RABU, C. PAGANO and M. TOURASSE S711

LWR containment aerosol experiments at VICTORIA facility. J. K. JOKINIEMI, J. M. MÄKYNEN, E. I. KAUPPINEN, H. TUOMISTO and O. HONGISTO S713

Aerosol generation studies for retention experiments in the PECA facility. M. J. MARCOS-CRESPO, F. J. GÓMEZ-MORENO and M. MARTÍN-ESPIGARES S715

Poster Session II 44: Gas Cleaning

Diffusive mask—the new method of human lungs protection. V. V. OVCHINNIKOV and G. V. LIOUBIMOVA S717

Estimating the filter efficiency from an electrostatic filter device by measuring the decay of the aerosol concentration in a room. G. SCHEUCH, K. SOMMERER, F. HAAS, W. MÖLLER, W. BRAUN and J. RZEZNIK S719

A study of filtration properties of dust cake on fabric filters. C.-J. TSAI, H.-C. LU and T.-Y. HUANG S721

Efficient filtration methods for diesel aerosols. T. CIACH, T. R. SOSNOWSKI and A. PODGÓRSKI S723

Filtering efficiency of stiff fibrous particles on single filter element. P. GRZYBOWSKI and L. GRADOŃ S725

Laboratory station for the comprehensive testing of filtering performance. W. PIŁACIŃSKI and E. SARNECKA S727

Diffusional deposition of finite size aerosol particles in model filter at intermediate Knudsen numbers. V. I. ROLDUGHIN and A. A. KIRSCH S729

Diffusional deposition of aerosol particles in model filter at small Peclet numbers. V. I. ROLDUGHIN and A. A. KIRSCH S731

The improvement of aerosol control and monitoring system LADA. V. I. KALECHITS, A. A. KIRSCH and O. YU. MASLAKOV S733

Pressure drop of loaded fibrous filters. M. N. LEBEDEV and A. A. KIRSCH S735

Development of test methods for electret filters. M. LEHTIMÄKI S737

Agglomeration of bipolarly charged aerosol particles in alternating electric field. A. LAITINEN, J. HAUTANEN, J. KESKINEN, E. I. KAUPPINEN, J. JOKINIEMI and K. LEHTINEN S739

The effect of solid aerosol on prefilter material performance. A. GRAEF, J. I. T. STENHOUSE and D. C. WALSH S741

Pressure drop in porous media at arbitrary Reynolds numbers. M. KROL S743

Theoretical study of nonuniform droplets concentration distribution on venturi scrubber performance. J. FATHIKALAJAHI, M. TAHERI and M. R. TALAIE N/A

Poster Session II 45: Instrumentation

Design of high volume corona charger. S. H. CHENG, M. B. RANADE and J. W. GENTRY S745

Diffusion battery particle sizing system based on the MSA data conversion algorithm: experimental examination. S. I. EREMENKO, R. CALDOW, A. M. BAKLANOV, M. HAVLICEK and G. SEM S747

Conversion of the diffusion battery data to particle size distribution: multiple solutions averaging algorithm (MSA). S. EREMENKO and A. ANKILOV S749

Application of photochemical ultrafine aerosol particles generators for SMPS and DB size resolution testing. A. M. BAKLANOV, S. N. DUBTSOV, R. CALDOW, M. HAVLICEK and G. SEM S751

The influence of sample line material on deposition efficiency. S.-H. CHEN and I. COLBECK S753

Portable high-throughput liquid-absorption aerosol sampler. S. ZAROMB, A. BIRENZVIGE and A. AKINYEMI S755

Calibration of three direct reading dust monitors. C.-J. TSAI and T.-S. SHIH S757

The photoacoustic soot sensor (PASS)—validation for airborne particulate carbon. A. PETZOLD and R. NIESSNER S759

A new on-line measurement method for particle sizing. C. XIAOSHU, Z. GANG, W. NAINING and Z. HONGWU S761

On the use of multijet-multistage impactors. M. DIOURI and I. S. SANDA S763

A numerical prediction of the aspiration efficiency of a thin-walled, shallow-tapered sampler rear-facing the wind. D. B. INGHAM, X. WEN, N. DOMBROWSKI and E. A. FOUMENY S765

Laminar flow thermal diffusion cloud chamber for the study of cloud condensation nuclei. P. AALTO S767

Homogeneous nucleation rate measurements of *n*-butanol using UCPC (TSI model 3025). J. AUGUSTIN, K. HÄMERI, M. KULMALA and E. KRISSINEL' S769

On-line mobility analyzer: set-up and first measurements. U. SIEVERT and H. O. LUCK S771

A noninvasive method for measuring particle mass concentration of wet aerosols with particles up to accumulation mode size—theory and design. E. PFALZMANN and P. SEQUARD-BASE S773

A non invasive method for measuring particle mass concentration of wet aerosols with particles up to accumulation mode size—comparative measurements. E. PFALZMANN S775

Characterisation and modelling of a family of cyclone aerosol preseparators. L. C. KENNY and R. A. GUSSMAN S777

Evaporation of a freshly produced salt aerosol from a jet nebulizer. G. A. FERRON S779

Dual light scattering geometry for determination of particle refractive index. W. W. SZYMANSKI and A. PODGORSKI S781

Flow pattern visualization in differential mobility analyzers. K. DEPPERT, G. FRANK and E. SWIETLICKI S783

Low pressure impactor measurements with duplicated stages to minimize particle bounce effects. U. TAPPER, T. VALMARI, T. LIND and E. I. KAUPPINEN S785

Resolution of Vienna type DMA in 1 nm size range. J. KESKINEN, T. MATTILA, A. UKKONEN, V. JOKINEN and J. M. MÄKELÄ S787

Locally fluidized bed aerosol generator as powder feeder for thermal spraying. M. PAAJANEN and J. TIKKANEN S789

Calibration and application examples of the LPC 1-200 liquid-borne particle counter. A. CZITROVSZKY, T. MOSONI and P. JANI S791

Application examples of APC-03-2 and APC-03-2A airborne particle counters in a highly contaminated environment. A. CZITROVSZKY and P. JANI S793

Optimisation of a sampling cyclone to the new international sampling convention for respirable dust. G. LIDÉN and A. GUDMUNDSSON S795

Measuring electric charge on individual aerosol particles. P. H. W. VERCOULEN, J. C. M. MARIJNISSEN and B. SCARLETT S797

Aerosol particle velocity and size measurement by photon correlation. P. JANI and A. CZITROVSZKY S799

Organic aerosols analysis by thermal desorption-gas chromatographic method. I.-F. HUNG, T.-S. SHIH, C.-K. HUNG and K.-C. HUANG S801

A study of interactions and reactivity of ambient aerosols by a dual-impactor technique. M. BIZJAK, B. DIVJAK, A. BERNER, V. HUDNIK and P. PAVLI S803

A fogwater collector for high flow velocities. P. KORHONEN and Y. VIISANEN S805

On possible characteristics of cosmosol generators. V. E. KOSTROMIN and S. K. AYZATULIN S807

Poster Session II 46: Materials

Generation of monodisperse nanometer-size aerosol particles with variable size from colloidal precursors. A. GRAFF, F. OSLENDER and M. QUINTEN S809

Coagulation and coalescence in ultrafine metal powders. M. I. ALYMOV and Y. N. STEPANOV S811

Modified aerosol synthesis of nanostructured hexaferrite for magnetic media. V. V. PANKOV S813

Expedience of use aerosol synthesis of nanostructured material—reagent of thermochemical conversion. I. UVAROVA S815

Characterization of aerosols from finishes in industrial yarn processes. J. Mahy, P. Wessels, C. de Ruiter, R. W. M. Jansen, D. Camelot, W. Oostra and J. Marijnissen S817

Preparation of ZnS-CdS fine particles by the spray-pyrolysis. K. Okuyama, K. Tagami, N. Tohge and S. Tamaki S819

Ultrafine particles synthesis by ArF laser photolysis of TEOS vapor. P. Moravec, J. Smolík and P. Kubát S821

Model of a spray drying route for the production of CdS nanoparticles. I. J. Ford, P. J. Dobson, O. Salata and P. Hull S823

Analysis and reduction of the risk potential caused by laser alloying and transformation hardening of metals. G. Pohlmann, C. Dietz, S. Kasperowski, P. Kirner and D. Scheller S825

Microstructure of nanophase fullerene particles made via aerosol decomposition. J. Joutsensaari, P. Ahonen, U. Tapper, E. I. Kauppinen, A. S. Gurav and T. T. Kodas S827

Production of metallic nanoparticles via electrostatic atomization. M. Lohmann and A. Schmidt-Ott S829

Processing of spherical bioactive glass particles. V. Pitkänen, J. Tikkanen, M. Paajanen, G. Graeffe, M. Brink and K. H. Karlsson S831

Aerosol dynamics of palladium particle formation by spray pyrolysis. A. S. Gurav, T. T. Kodas, M. J. Hampden-Smith, P. Ahonen and E. I. Kauppinen S833

Paste-type aerosol-forming compositions. V. E. Kostromin S835

Poster Session II 47: Radioactive Aerosols

Air-borne radioactive aerosol over contaminated area (numerical modeling). M. V. Buikov S837

Investigations of dynamics of radioactive nuclide carriers in the atmosphere in Vilnius. V. Lujanas and G. Lujanienė S839

Apparatus for experimental studying of β-active aerosol electrization. E. P. Emets and P. P. Poluektov S841

Maximum likelihood estimates of deposited radioactive aerosols distribution from severe nuclear accidents. B. L. Semenov, R. V. Arutyunjan, V. E. Gorshkov, V. I. Tarasov and E. V. Tkalya S843

Real-time measurement of radioactive aerosols in the environment after a 10 μm size selection. L. Grivaud, J. Charuau, S. Fauvel and J. Fazilé Abasse S845

Radioactive aerosols as tracers of turbulent vertical diffusion: measurements in the city of Milan. G. M. Marcazzan and A. Testa S847

Plenary Lecture 48

Production of nanophase materials. H. GLEITER N/A

Oral Session 49: Atmospheric VIII—Soot

Analysis of molecular sticking probabilities. C. F. CLEMENT, T. VESALA and M. KULMALA S849

Analysis of sticking coefficients and uptake of trace gases by liquid droplets. T. VESALA, M. KULMALA, T. PETER and B. P. LUO S851

Soot aerosol in the atmosphere: contributions by aircraft. R. F. PUESCHEL, S. VERMA, S. D. HOWARD, G. V. FERRY, J. GOODMAN and D. A. ALLEN S853

Multivariate analysis of urban aerosol, black carbon and gaseous pollutants in cold climate. J. RUUSKANEN, P. MINKKINEN, A. MIRME and J. SURAKKA S855

The school black carbon measuring network in Slovenia—results of the campaign January–February 1995. M. BIZJAK and A. D. A. HANSEN S857

Oral Session 50: Materials IV—Nanomaterials

Production of nanometer-sized metal oxide particles by gas phase reaction in a free jet. R. S. WINDELER, K. E. J. LEHTINEN and S. K. FRIEDLANDER S859

Aerosol synthesis of nanophase yttrium aluminate powders: can phase control be achieved by precursor design? M. NYMAN, J. CARUSO, M. J. HAMPDEN-SMITH and T. T. KODAS S861

Synthesis and morphology of coated nanoscaled ceramic powders. D. VOLLATH and D. V. SZABÓ S863

Particle measurements in premixed $H_2/O_2/Ar$ low pressure flames doped with SiH_4. D. LINDACKERS, M. G. D. STRECKER and P. ROTH S865

Production of nanophase fullerene particles via aerosol routes. J. JOUTSENSAARI, P. AHONEN, U. TAPPER, E. I. KAUPPINEN, A. S. GURAV and T. T. KODAS S867

Oral Session 51: Gas Cleaning II—Emission Control

A study of cleaning process in pulse-jet baghouse. H.-C. LU and C.-J. TSAI S869

Formation of ultrafine particles inside an electrostatic precipitator caused by interaction of denitrification unit and corona discharge. M. MOHR, S. YLÄTALO, O. RICCIUS and E. I. KAUPPINEN S871

Submicron particle separation in cyclones based on droplet growth by heterogeneous condensation. S. HEIDENREICH, S. SCHABEL, B. SACHWEH, H. BÜTTNER and F. EBERT S873

Particle penetration in condensational aerosol scrubbers. J. T. JOHANNESSEN, J. A. CHRISTENSEN and H. LIVBJERG S875

A two-zone wet electrostatic precipitator development. D. A. LUNDGREN S877

Oral Session 52: Bioaerosols

Aerodynamic particle sizing of airborne bacteria. S. A. GRINSHPUN, K. WILLEKE, V. ULEVICIUS, Y. QIAN and J. DONNELLY S879

Characterizing the mold exposure in schools—comparison of the new single-stage impactor and Andersen six-stage impactor. T. MEKLIN, A. NEVALAINEN, A. JUOZAITIS and K. WILLEKE S881

Microbial stress, bounce and re-aerosolization in bioaerosol samplers. K. WILLEKE, S. A. GRINSHPUN, V. ULEVICIUS, S. TERZIEVA, J. DONNELLY, S. STEWART and A. JUOZAITIS S883

The influence of NO_2 on allergenic pollen studied by secondary ion mass spectrometry. J. GOSCHNICK and J. SCHURICHT S885

Influence of cooling type on airborne viable fungi. A. HYVÄRINEN, M. K. O'ROURKE, J. MELDRUM and L. STETZENBACH S887

Oral Session 53: Atmospheric IX—Aerosols and Clouds

The impact of the physico-chemical microstructure of atmospheric aerosols on the formation of stratiform clouds. A. BOTT S889

The effect of hygroscopicity and trace gases on cloud droplet formation. M. KULMALA, P. KORHONEN, T. VESALA, H.-C. HANSSON, K. NOONE and B. SVENNINGSSON S891

Field studies on the cloud processing of atmospheric aerosol particles and trace gases. M. KRÄMER, J. BRINKMANN, C. EICHEL, R. JAENICKE, D. SCHELL, M. SCHÜLE and L. SCHÜTZ S893

Influence of emission and transportation characteristics on chemical cloud water composition at Mt. Brocken (Germany). W. WIEPRECHT, D. MÖLLER, K. ACKER, S. NAUMANN and R. AUEL S895

Activation properties of marine aerosol in the Netherlands. A. KHLYSTOV, G. P. A. KOS, H. M. TEN BRINK, A. BERNER and C. KRUISZ S897

On the aerosol-cloud relationship at a high-alpine site. U. BALTENSPERGER, M. SCHWIKOWSKI, H. W. GÄGGELER and O. POULIDA S899

Oral Session 54: Materials V—Nanomaterials

Electron microscopy of small particles. A. R. THÖLÉN S901

GaAs nanocrystals from Ga aerosols. K. DEPPERT and L. SAMUELSON S903

Characteristics of ZrO_2 nanopowders produced by electrical explosion of wires. Y. A. KOTOV, I. V. BEKETOV, T. I. DEMINA, A. M. MURZAKAEV, O. M. SAMATOV, G. SCHUMACHER and R. BÖHME S905

Laser particle precipitation-aided chemical vapour deposition of nanosized silicon carbonitride powders. W. F. A. BESLING, P. J. J. M. VAN DER PUT and J. SCHOONMAN S907

Characterization of nanosized aerosol particles produced by laser ablation. S909
B. SCHLEICHER, S. K. FRIEDLANDER, S. JAIN and T. T. KODAS

Oral Session 55: Gas Cleaning III—Filtration

Efficiency of fiber filters at low pressures: a comparison of theory and experiment. S911
M. B. ATTOUI, A. RENOUX and D. BOULAUD

Experimental study of stationary filtration with model fiber filters: comparison with different deposition models. S913
R. GOUGEON, D. BOULAUD and A. RENOUX

Experimental studies of the fibrous filters coupled with external electrical field. S915
J. LUCKNER, Z. WERTEJUK and L. GRADOŃ

The effect of filter packing density on aerosol particle bounce. T. YLITUOMI, J. I. T. STENHOUSE and D. C. WALSH S917

Polymeric fiber materials for fine cleaning of gases. A. D. SHEPELEV and V. A. RYKUNOV S919

Dispersion of aerosol boluses in packed beds. M. SHAPIRO and S. LEKHTMAKHER S921

Oral Session 56: Basics VI—Morphology

Equivalent diameters of non-spherical particles. A. SCHMIDT-OTT and J. WÜSTENBERG S923

On the time evolution of inertia and inertialess particle populations during acoustic agglomeration as a function of acoustic power. PH. CAPÉRAN, J. SOMERS and K. RICHTER S925

Morphology-dependent resonances of clusters of spherical particles. G. REUTER, T. KAHLAU and M. QUINTEN S927

Three-dimensional Navier-Stokes simulation of binary collisions between droplets of equal size. M. RIEBER and A. FROHN S929

Drift of spheroidal particles moving in a shear flow near a solid wall. E. GAVZE and M. SHAPIRO S931

Evaluation of the density autocorrelation function for fractal aggregates from the light scattering data. R. CH. BOKUN S933
